JOURNAL OF COMPUTATIONAL AND APPLIED MATHEMATICS

Volume 134, Numbers 1–2, 1 September 2001

Contents

A. Horwitz
A version of Simpson's rule for multiple integrals 1

A.G. García and M.A. Hernández-Medina
The discrete Kramer sampling theorem and indeterminate moment problems 13

S. Christiansen
Detecting non-uniqueness of solutions to biharmonic integral equations through SVD 23

D. Furihata
Finite-difference schemes for nonlinear wave equation that inherit energy conservation property 37

J. Wang and R. Liu
A new approach to design high-order schemes 59

D.J. Walton and D.S. Meek
Curvature extrema of planar parametric polynomial cubic curves 69

H. Begehr and X. Li
Approximate solution of periodic Riemann boundary value problem for analytic functions 85

N.J. Daras
Composed Padé-type approximation 95

G. Boros, V.H. Moll and R. Nalam
An integral with three parameters. Part 2 113

S. Meddahi and M. González
A fully discrete BEM–FEM method for an exterior elasticity system in the plane 127

M.-N. Le Roux, M.-I. Cozic and R. Loubère
Analysis of completely discrete finite element method for a free boundary diffusion problem with absorption 143

P.K. Dutt and S. Bedekar
Spectral methods for hyperbolic initial boundary value problems on parallel computers 165

A.A. Badr
Integro-differential equation with Cauchy kernel 191

E.J.M. Veling
Analytical evaluation of some Bessel function integrals related to Sonine's finite integrals 201

H. Windcliff, P.A. Forsyth and K.R. Vetzal
Shout options: a framework for pricing contracts which can be modified by the investor 213

R. Baltensperger and J.-P. Berrut
The linear rational collocation method 243

G. Han and J. Wang
Extrapolation of Nystrom solution for two dimensional nonlinear Fredholm integral equations 259

M. Al-Baali
On the behaviour of a combined extra-updating/self-scaling BFGS method 269

I. Boglaev
Domain decomposition for a singularly perturbed parabolic problem with a convection-dominated term 283

P. Almenar and L. Jódar
Mixed problems for separated variable coefficient wave equations: analytic–numerical solutions with a priori error bounds 301

G. Mastroianni and D. Occorsio
Optimal systems of nodes for Lagrange interpolation on bounded intervals. A survey 325

H. Liu, J. Wang and G. Warnecke
Convergence of a splitting scheme applied to the Ruijgrok–Wu model of the Boltzmann equation 343
